① Congo and Red on the color macro channel overwrites the RGB mixcolor and inserts a filter.

② Overwrites the RGB mixcolor with Amber only or Mint only.

③ The pan channel controls the speed of the rotation when set to pan mode 'continuous rotation' (FULL CCW - STOP - FULL CW).

④ When storing internal position presets by DMX hold the value on the pan-mode channel for 3 sec.

⑤ Set and hold value to optimize performance for narrow or wide beam.
